See your world grow

Rio Tinto is a leading international mining group, headquartered in the UK. Rio Tinto's business is finding, mining and processing mineral resources. Major products are aluminium, copper, diamonds, energy (coal and uranium), gold, industrial minerals (borax, titanium dioxide, salt, talc) and iron ore. Activities span the world but are strongly represented in Australia and North America with businesses in South America, Asia, Europe and Southern Africa.

Rössing Uranium Limited is proud to be a Namibian Equal Opportunity Employer. As part of the Rio Tinto Group, we are dedicated to leading edge environmental, health, safety, community and competitive employment standards. We are focused on advancing our mining and metallurgical technology and becoming an innovative supplier of clean, environmentally friendly energy to approved electricity generators worldwide.

As per the Affirmative Action (Employment) Act, Act 29 of 1998; Namibian Citizens from historically disadvantaged groups, especially women and people living with disabilities, will enjoy preferential treatment. Only short-listed candidates will be contacted.

Specialist: Process Safety

Process safety is a strategic priority for Rio Tinto and is critical for fatality risk reduction for Rössing. The role will be responsible to support the Manager Engineering and Projects to establish a robust framework and implementation plan to manage and control process safety risks.

Key performance areas

- Investigate accidents/incidents and recommend corrective/remedial measures.
- Ensure safety programmes are rigorous to ensure safety of personnel operating in the processing facility.
- Implement a world class process safety programme at Rössing.
- Provide process safety governance across site to ensure that the key process safety KPI's are being met.
- Coordinate, develop and implement Rössing's process safety strategic plan and road map.
- Lead the identification and review of process safety incident tracking in RTBS.
- Coordinate compliance and Rio Tinto governance reviews and audits to assess process safety element compliance and identify areas of improvement.
- Collaborate and share process safety risks management strategies with both external (Rio Tinto) and internal stakeholders to leverage the broader organisation for value creation through sharing knowledge, experience, resources and skills.
- Develop a highly capable team of people operating at their full potential.
- Recommend improvements to processes and facilitate improvement projects with other engineering and project teams.
- Monitor the outcome of the process improvement.

Minimum requirements

- recognised B.Eng. / B.Sc. / B.Tech. degree in one of the following disciplines: Chemical engineering, Process engineering, Mechanical engineering or Extractive metallurgy;
- minimum of five years' working experience in a major processing facility/plant or environment of which three years should have been in a supervisory capacity or a professional role;
- experience in implementing and sustaining process safety management systems with one or more process hazard analysis techniques is essential;
- a Code BE driver's licence.

To apply

Forward your curriculum vitae with a cover letter and certified copies of qualifications to the HR Advisor Engineering & Services, Rössing Uranium, Private Bag 5005, Swakopmund.
