

RioTinto

Rössing Uranium
Working for Namibia

Shaping the future

As pioneers in mining and metals, we produce materials essential to human progress. Our talented workforce uses industry-leading mining processes and technology to ensure our operations are safe, low cost and efficient. We have opportunities available:

Chemist

A vacancy exists for an experienced and technically competent Chemist in the Processing department, reporting to the Superintendent Metallurgy & Improvement.

The successful incumbent will be responsible for providing accurate and precise chemical analysis data for processing plant, mining, exploration, condition monitoring, environmental and water management sections for process control, short and long term planning and water quality monitoring within the parameters of cost and Rössing HSE standards.

Key performance areas

- Maintains health, safety and environment standards;
- Supervise and ensure targets are met pertaining to turn around time and the quality of work;
- Coordinates laboratory activities/analyses required to ensure achievement of planned laboratory productivity;
- Carries out weekly inspections on process sampling units and equipment and ensure deviations are timely rectified;
- Performs statistical evaluations for sample analyses;
- Investigates and compiles reports on QA/QC deviations;
- Must be able to use statistical certification and validation techniques.

Minimum requirements

- Grade 12 certificate;
- B.Sc. degree / B. Tech degree in Analytical Chemistry or Chemistry;
- Three to five years' relevant working experience as a Chemist in a chemical/mining/metallurgical laboratory of which at least one year should have been on a supervisory level;
- Experience in a wet chemical and instrumental inorganic or organic analysis will be an added advantage;
- Code BE driver's licence.
