

Shaping the future

Civil Engineer

A vacancy exists for a Civil Engineer in the Engineering & Projects department, reporting to the Superintendent Projects. The successful incumbent will be responsible for providing functional design, implementation and commissioning of capital projects by fulfilling quality requirements and ensuring that all quality system procedures are adhered to as documented.

Key performance areas

- Identifying, validating, justification and rolling out engineering design projects by using engineering principles and liaising with internal and external stakeholders;
- Assisting in rolling out the engineering strategy by keeping abreast with latest technological advancement;
- Responsible for detailed systems design and implementation of discipline specific projects;
- Responsible for continuous analysis and risk identification of the design system to ensure continuous improvement on technology choices; and
- Ensuring that designs eliminate and mitigate health, safety and environmental standard risks that are identified during various project stages.

Minimum qualifications

- Grade 12 and a recognised Bachelor of Engineering degree (B.Eng) or Bachelor of Technology degree (B.Tech) in Civil Engineering;
- A minimum of three years' post qualifying working experience;
- Experience in the building, roads construction industry, tailings dam management as well as project management will be an added advantage.
- Valid code BE driver's licence.

To apply
