

# Shaping the future

## Mining Engineer

A vacancy exists for a mining engineer in the Mining department. Supporting the superintendent Pit Operations, the successful candidate will be responsible for ensuring that mining processes are optimised in order to achieve production targets.

### Main responsibilities

- Maintaining Health, Safety & Environmental standards;
- Monitoring and co-ordinating implementation of production plans;
- Optimising utilisation of mining equipment;
- Controlling of crusher feed ore quality;
- Administration and optimisation of Dispatch System;
- Mining reconciliation and production reporting;
- Controlling of consumables cost;
- Identification and execution of business improvement projects.

### Minimum requirements

- A recognised Bachelor's / B Tech degree in Mining Engineering, plus two years relevant open pit mining experience; or
- A recognised National Higher Diploma in Mining Engineering, plus 10 years relevant open pit mining experience;
- A thorough understanding and adequate practical experience of hard rock open pit mining activities (drill & blast and load & haul);
- A valid code BE (08) driver's licence;
- Blasting Ticket;
- Applicants need to be prepared to work shifts.
