Rössing Uranium
Working for Namibia

Shaping the future

As pioneers in mining and metals, we produce materials essential to human progress. Our talented workforce uses industry-leading mining processes and technology to ensure our operations are safe, low cost and efficient. We have opportunities available:

Superintendent, Reliability

An exciting opportunity exists for a Superintendent, Reliability reporting to the Manager Maintenance. The primary purpose of the role is to provide technical expertise in order to ensure equipment reliability.

Key performance areas

- Enforce all set standards and ensure that all subordinates adhere to their personal safety plans;
- Develop a highly capable team of people operating at their full potential;
- Implement the Rio Tinto maintenance strategy and conduct a critical maintenance performance analysis to ensure optimal efficiency and longer, more profitable equipment lifecycles;
- Analyse asset reliability and produce forecasts and make recommendations for equipment and technology improvements, design changes or strategy amendments;
- Manage and direct the process of defect root cause analysis for relevant equipment types to ensure efficient preventative maintenance;
- Report on failures, the analysis and maintenance required, and most critical priorities and ensure that these are addressed;
- Identify equipment that requires replacement based on age and performance, so that cost effective maintenance is achieved;
- Recommend alternative measures to continuously reduce cost of maintenance; and
- Continuous improvement.

Minimum qualifications

- Grade 12 with 20 points;
- a recognised B.Sc./B.Eng/B.Tech. degree in Mechanical, Mechatronics, Electrical or Electronic Engineering;
- minimum of five years' working experience in a process plant environment of which three years should have been in a supervisory position;
- Registered as a Professional Engineer or Incorporated Engineer will be an added advantage;
- A code BE driver's licence.
