STAKEHOLDER REVIEW OF THE SEA SCOPING REPORT FOR RÖSSING URANIUM’S PROPOSED DESALINATION PLANT

Rössing Uranium Limited (Rössing Uranium) proposes to construct and operate a new desalination plant approximately 6 km north of Swakopmund, at the existing Swakopmund Salt Works.

Rössing Uranium appointed SLR Environmental Consulting (Namibia) (Pty) Ltd (SLR) and AURECON Namibia (Pty) Ltd (AURECON) to jointly manage the Social and Environmental Impact Assessment (SEA) process for the proposed project.

The SEA public participation process commenced in the beginning of July 2014 and various focus group meetings and a public meeting were held with interested and affected parties (I&APs) at the end of July and beginning of August 2014.

Subsequently, SLR & Aurecon prepared a Scoping Report that is now available for review by I&APs.

Description/nature of proposed activities
This project will comprise the following components that are described in more detail in the Scoping Report:

- The water intake system and associated infrastructure,
- Infrastructure (i.e. channel or pipeline) to transport water to the plant,
- A water receiving tank (or existing salt works pond),
- The pre-treatment plant that will remove sediments, solids and organic matter,
- A modular seawater reverse osmosis (SWRO) desalination plant with a capacity of approximately 3 million m³/year (8,300 m³/day),
- The waste water outlet system and associated infrastructure,
- A new 11kV power line of approximately 6km, together with a new substation at the plant,
- A water supply line of roughly 850m to the existing Nanawater pipeline, transporting desalinated water,
- Related services and infrastructure i.e. offices, access road, etc.

Availability of the Scoping Report for review
A hard copy of the Scoping Report is available at the following places:
- Swakopmund Public Library
- Aranos Public Library
- Walvis Bay Public Library
- National Library in Windhoek

The report can also be downloaded from the following websites:
- www.rossing.com

Alternatively, CD’s containing electronic copies of the Scoping Report and all of its supporting documents are available on request to SLR and/or Aurecon.

STAKEHOLDER REVIEW OF THE SEIA SCOPING REPORT FOR RÖSSING URANIUM’S PROPOSED DESALINATION PLANT

Rössing Uranium Limited (Rössing Uranium) proposes to construct and operate a new desalination plant approximately 6 km north of Swakopmund, at the existing Swakopmund Salt Works.

Rössing Uranium appointed SLR Environmental Consulting (Namibia) (Pty) Ltd (SLR) and AURECON Namibia (Pty) Ltd (AURECON) to jointly manage the Social and Environmental Impact Assessment (SEIA) process for the proposed project.

The SEIA public participation process commenced in the beginning of July 2014 and various focus group meetings and a public meeting were held with interested and affected parties (I&APs) at the end of July and beginning of August 2014.

Subsequently, SLR & Aurecon prepared a Scoping Report that is now available for review by I&APs.

Description/maturity of proposed activities
The project will comprise the following components that are described in more detail in the Scoping Report:

- The water intake system and associated infrastructure.
- Infrastructure (i.e. channel or pipeline) to transport water to the plant.
- A water receiving tank (or existing salt works pond).
- The pre-treatment plant that will remove sediments, solids and organic matter.
- A modular seawater reverse osmosis (SWRO) desalination plant with a capacity of approximately 3 million m³/year (8,200 m³/day).
- The waste water outlet system and associated infrastructure.
- A new 11 kV power line of approximately 6 km, together with a new substation at the plant.
- A water supply line of roughly 850m to the existing NamWater pipeline, transporting desalinated water.
- Related services and structures (i.e. offices, access road, etc.
